128	Combination Memory Levels
	Intra-&Inter Division Couplers

Opus 11831

Built in 1991 by the M P Moeller Organ Company of Hagerstown, MD, Trinity's Organ was one of the last dozen instruments built by the historic firm. It contains 3,362 pipes, each one custom made and voiced both to support worship in hymns and liturgy and to serve as a concert instrument capable of playing music for the organ written from all periods. Miller Pipe Organ Company of Buford, GA maintains the instrument.
